

PRODUCT DATA SHEET / SPECIFICATIONS

DESCRIPTION

Eco-Blok™ is a patent pending erosion control product made of recycled crumb rubber for use as an alternative to sand bags in the containment of liquids, semi-liquids and solids. Unlike sand bags, Eco-Blok™ will not break down, tear or rupture. Eco-Blok™ helps to solve the problem of pollution, not make it worse. Instead of replacing sand bags in six months, Eco-Blok™ will last for years. **The product comes in Barrier or Filter versions.**

SPECIFICATIONS

Height: 4 inches
Width: 12 inches
Length: 24 inches

Weight: 30 lbs.
Content: Bonded recycled crumb rubber
Shape: Interlocking bull nose

FEATURES

- Uniform size, shape and weight
